

A tool/application to easily generate ALC related documents in ECHS Polyclinics.

Download and install the attached ALC Medicine Reports Generator application (it will ask for extra permission, click on more info and then on run anyway [if you are using Windows Defender – you might have to turn off ‘Smart App Control’ in Windows Defender]).

How to use it:

- A. Create a folder to place the daily reports.
- B. Right click and create two Microsoft Excel Files:
 1. ALC Report - containing daily reports of ALC Medicines ordered (captured from the approval page – in OIC Module [or] from the Receive order page post approval – from Stock Manager Module) and,

	A	B	C	D
1	#	Nomenclature	Patient Name	Qty
2	1	Medicine 1	Name 1	30
3	2	Medicine 2	Name 1	60
4		So on...		

ALC Medicines Ordered – Data sheet example.

2. Patient Data Sheet – containing the Patient Data for that day (captured from the OIC Module – Daily Patient Report)

	A	B	C	D	E	F	G	H	I	J	K	L
1	#	Patient Name	ESM Name	Rank	Service No	DOB	Relation with ESM	Mobile No	Card No	Card Type	OPD Remarks	
2	1	Name	Name	Rk	No	DOB	Rel	xx	xx	xx	---	
3	2	Name	Name	Rk	No	DOB	Rel	xx	xx	xx	---	
4		So on...										
5												

Patient Data – Data sheet example (the color would be blue, same as the ALC Medicines Ordered)

- C. Create a folder to place the generated daily reports.
 - It is suggested to create a folder for current day to hold both the data folder and the reports folder.
- D. Open the ALC Medicine Reports Generator by double clicking on it (or with – right click and open),
 1. Select the ALC data for the day
 2. Select the Patient data for the day
 3. Specify the destination folder for the generated reports (folder that we have just created for the reports)
 4. Click Generate reports
 5. Open the destination folder

Patient Name wise ALC order list, Consolidated list of medicine ordered for that day and Merged order list including the patient’s full details are generated and saved to the reports folder.
